Evens   Tickets   Help   Fixed   Profile

At the bottom of the screen you can access to several features, of which we want to highlight two:
- "Fixed": allows you to leave "fixed" the event of your interest, so that the next time you access the application, you will enter the event directly, thus speeding up the process.
- Profile: access to user profile information, where we can see that we are connected as an exhibitor.

Evens   Tickets   Help   Fixed   Profile

Visitor registration at the stand.

- To access this functionality, click on the "Visits" icon and access the visit list directly.

- To register a visit we must scan the QR code that have the "tickets" that are delivered at the hostess counter or in the accreditations that visitors bring with them.

To do this, we must press the icon that activates the camera and focus on the QR code, and the data will automatically be obtained.
In the event that the visitor's data is not recovered, for not having previously accredited, the data will be left without problems.
Automatically recovered data can be modified and saved.

In the details of the visit you can add information:

- **Company:** basic information normally automatically retrieved from visitor data.

- **Contact:** also automatically retrieved from visitor data.

- **Interests:** allows to register the visitor's interest at the time of his visit.

- **Notes**: it allows you to collect notes from the meeting, you can also send a summary by e-mail to the visitor.

- **Evaluation:** allows you to internally evaluate the visit for later review.

- **Actions:** allows you to register a next action for a next visit, call, sending new information, etc.

Access to the Private Zone in Web environment

- In addition to the Valencia Fair App, a web application is available from which you can also consult and manage different aspects of your participation in the Valencia Fair events and contests, for example:
  Feria Valencia

  User

  nsimo@feriavalencia.com

  Password

  ●●●●●●●●

  ☐ Keep session alive   **Login**

  Forgot password?

- **Catalog:** Self-management of basic information as an exhibitor to display in the Online Web Catalog and in the App Catalog
- **Visitor Registration**: consultation of the data of visits obtained through the Valencia Fair App.
- **Interests:** consult the data of visitors obtained through the App of Feria Valencia and also from the catalog both in web environment and from the App.

  The access address is: https://apps.feriavalencia.com

The functionalities are divided into 4 groups:

- **Visits:** gives access to the Visits menu. Show the list of visits.

- **Interests:** It shows two options, one for the list of Interests that visitors have shown about our company and another for interest on our products.

- **Catalog:** shows two options:
  - "Exhibitor Catalog" from where we can check and modify our data that will be displayed in the online catalog (App and Web), Products, brands, activity and sectors.
  - "Products Catalog" which, although they can be managed from the previous menu, an entry in the menu has been established here as well.

- **Contact:** to consult directly with Feria Valencia for any questions.
